

# NO CRACK COLOR PAINT

NO CRACK COLOR PAINT FOR ROLL ENDS

## PAINT NO CRACK COLOR

Provides protection for NO CRACK COLOR membrane joints

Elastic properties provide higher durability and resistance

Excellent adhesion to different kinds of surfaces.

Excellent aesthetic surface finish.

Matt anti-reflex hues increase solar radiation resistance.

Compatible with asphalt products.

Easy application.

Aqueous-based paint. Supports diluting with water.

### How Supplied

1-Kg. plastic cans  
4-Kg. plastic cans

### Features

NO CRACK COLOR paint is an acrylic-based waterproof coating specially made to be used over NO CRACK COLOR joints. NO CRACK COLOR paint allows you to complete a suitable waterproofing system.

NO CRACK COLOR paint turns into an elastic highly resistant waterproof film, which can efficiently cope with any roofing stress situation.

Complete drying in-between coatings takes 4-6 hours, depending on local weather conditions at the time of application.

NO CRACK COLOR paint is highly resistant to solar radiation because of its anti-reflex hues, and is available in English green, fired brick red, and chalk white colors.

### Where

Over NO CRACK COLOR membrane joints,  
Over in-situ applied asphalt waterproofing

### Application

Apply on a perfectly clean and dry surface, using a paint roller or a brush. Apply a first coating thoroughly over the NO CRACK COLOR membrane joint. Let dry, and apply a second coating in the same way.

### Yield

Minimum recommended yield is 0.25 Kg/m<sup>2</sup>, but it may vary depending on the surface wear and absorption.

### Caution

Do not apply under rainy conditions or when room humidity is above 80%, since the surface may not dry properly. Only dilute with water. Do not use solvents. Let dry between coatings.
